ABSTRACT

This publication summarizes a variety of information on each of the 42 public schools in Eugene (Oregon) School District 4J, presented in the form of two-page statistical profiles of each individual school. Five basic categories of information are contained in each profile, including data on building characteristics, student information, staff information, community factors, and test scores on nationally standardized tests. These data were gathered from U.S. Census data and the Oregon Total Information System, as well as from records of the Eugene school district. Most of the data listed are for the 1975-76 school year, though figures on the cost of vandalism and standardized test scores are for 1974-75. (JG)

INTRODUCTION

The Eugene School Profile is a document which summarizes information from each of the schools in the Eugene School District 4J. It has been designed as a tool to aid educational decision makers in the planning and budget process. Information was obtained from the Lane Council of Governments (LCOG), the Oregon Total Information System (OTIS), Eugene School District 4J Media Center, the Superintendent's office, and the Plant Management office.

Prior to publication each Principal received a profile of his or her school. It was requested that they review the information and suggest needed changes. All profiles returned with changes were reviewed and appropriate corrections were made.

Action High and Opportunity Center are not contained in this edition of the School Profile due to a lack of information. However, data are being collected and will be included in a future update of the profile.

The information in this Profile is presented as accurately as possible. However, part of these data are subject to sampling error, changes in personnel files, limitations of the data files within District 4J, and human related error since most of the information was, by necessity, assembled by hand.

The remainder of the introduction defines how the data were obtained and tabulated. Each item is presented in the order that it is found within the School Profile. District averages for appropriate items can be found in the margin. These averages are determined for each educational level, i.e., high school, junior high, and elementary.

Building Characteristics

1) Location of School - This is the physical, street location of the school.

2) Date of construction - This is the date of completion of the first structure at this school's site.

3) Square feet of primary educational space per student - Primary educational space is defined as any classroom of 500 square feet or more, educational laboratories, (reading, language, science, others), lecture rooms, home economics, industrial arts (automotive, metal, industrial mechanics, woodworking, electricity-electronics, drafting-mechnical drawing, forestry), student rooms (play, quiet,

activity, study, student work, reading, listening, large group), special education (deaf, emotionally handicapped, educable mentally retarded, Easter Seal program when housed in public school, trainable mentally retarded, and speech therapy), music-ensemble-instrumental, other classrooms. The total for each school was obtained from the Building Capacity Study. It was then divided into the total number of students in the school to determine the average allotment of space each student had in the school.

4) Number of library books per student - The total number of library books was obtained from the Multi-Media Center, and includes all books, excluding texts, assigned to the library. The number of books per student was obtained by dividing the total number of students into the number of books. A cautionary note: each school is assured of a basic library of 1600 books, therefore a small school may have a very large number of books per student, yet have very little variety when compared to a larger school which may have more total books, but fewer books per student.

5) Square feet of gymnasium space per student - The number of square feet of gymnasium space was obtained from the Building Capacity Study and was divided by the number of students in the building.

6) Annual cost of vandalism 1974-75 - This is the annual cost of material and labor incurred by each school to replace or repair damages to equipment or building due to vandalism. This information was obtained from the Plant Management Department.

7) Size of site (in acres) - This figure was provided by the Plant Management Office as an estimate of the total acreage of the entire site -- buildings and surrounding grounds.

8) Special Programs - This includes any special programs the school maintains.

Student Information

9) Total number of regular students enrolled as of September 30, 1975 - As implied, this is the total enrollment for each school as reported by the Classification Report. However, each kindergarten student is considered .5 of a regular full-time student.

10) Number of students enrolled in Special Education Programs as of 9-30-75 - This is the total number of Educable Mentally Retarded, Trainable Mentally Retarded, Emotionally Handicapped, Easter Seal Program, Learning Disabilities, and Deaf children in the school.

11) Average percent days absent - The data for this figure was acquired from the Pupil Personnel Report Form. It was calculated by dividing the total number of days absent for all students by the total number of days attendance possible.

Staff Information

NOTE: These data include all certificated staff in a building.

12) The average total number of years of experience - This figure was tabulated by summing the total number of years of experience for all certificated staff members in a building and dividing by the total number of certificated staff members in that school.

13) The average total number of years in the 4J School District - This figure was tabulated by summing the total number of years of experience in the 4J School District for the certificated staff member in a building and dividing by the total number of certificated staff members in that school. The information for both figures was from District personnel files.

14) Percent of staff with Bachelors only - This value reflects the number of certificated staff with only a Bachelor level college degree divided by the total number of certificated staff in the school. This information was from District personnel files.

15) Percent of staff with Bachelors +45 - This figure was tabulated following the same procedure described in item 14 and represents the percentage of staff with a Bachelors degree with 45 additional credit hours of study.

16) Percent of staff with Masters only - This figure represents the percent of Masters level degree staff.

17) Percent of staff with Masters +45 - This represents the percent staff with a Masters degree with 45, or more additional hours of study. Again, all data were obtained from District personnel files.

18) Average salary for Certificated Staff - This value was obtained from District personnel files and was derived by summing the salary of each certificated staff member and dividing by the total number of certificated staff members in a building.

Community Factors

Community factors were ascertained from the 1970 census, therefore are estimates of 1975 characteristics. The information was made available through the Lane Council of Governments. The census data were transformed so that the figures offered in each of the items related directly to the school's attendance area and takes into account all individuals in the area. In addition there were sampling error and protection from personal disclosure. The bias introduced when personal disclosure protection criteria was applied affects those areas where population density is low. For example, if a census area contained only one family and the information was published for that area, the family

may be exposed to unwanted public disclosure. Thus schools in rural areas may have highly biased information due to the fact that a portion of their population could not be represented. Though admittedly not perfect, the census data are the most accurate information available for community related viewed.

19) Percent of individuals 25 years or older with four or more years of college - This item gives an estimate of the proportion of individuals with four or more years of college.

20) Percent of persons living at the same residence from 1965 to 1970 - This gives an estimate of the relative mobility of the individuals in the area. Persons sampled were those who are renters and homeowners.

21) Percent of individuals living in structure with 1.01 or more persons per room - This figure is computed by dividing the number of persons in the unit by the number of rooms in the unit, (living rooms, dining rooms,kitchens, bedrooms, finished recreation rooms, family rooms, etc.). The figures, therefore, refer to the number of housing units having the ratio of 1.01 persons per room.

22) Average family income - This is the average income of each family including wages earned by all members 14 years and older.

Testing Information

The testing information was acquired during the 1974-75 academic year. Test scores for the Elementary School represent the sixth grade averages as determined by the Gates-MacGinitie Reading Test and the Metropolitan Mathematics Test. Test scores for the Junior High School represent the ninth grade average, and test scores for the High School were taken from the eleventh grade. The Iowa Test of Educational Development was used in testing the secondary schools.

Errors associated with testing information can come from test development, statistical treatment of the data, test use, and student reaction to content and/or testing situation. During the past few years standarized testing in the Eugene District has been de-emphasized and as a result the precise testing procedure for administration of the tests may not have been observed in all cases. As a result of these constraints the test data should be viewed as estimates and interpeted with caution.

Principal's Statement

During the review by principals it was suggested that each principal have the option of including a brief statement about their school. This statement could contain anything they felt was of importance to their school that may not have been covered by the profile. This option was offered to all principals. When this option was exercised the statement was included.

Principal's Statement

The Jefferson staff and students work together to create a comfortable learning environment. Students use counseling services and a teacher-student advisor system to select individualized programs from a wide range of elective offerings. Such offerings include a class for apathetic students and a class for emotionally handicapped students.

Besides the regular extracurricular activities, all students may participate in an after-school intramural program. Jefferson students may also enroll in Jefferson II, an alternative school-within-a-school, which allows students to pursue their studies as members of small groups. Students explore career opportunities through various art, music, and industrial education electives.

Principal's Statement

Patterson tries to provide parents with a choice of a nearly traditional program for pupils and a more open choice program. Twenty percent of the current student body transfers here from other attendance areas in the district, stating they are attracted by the choice of programs. The turn-over rate (moving in and out) of non-transfer students has exceeded 72% the past 3 years. After mid-year the typical new pupil has been in 4 or more schools. On any given day, between 30-40 pupils are living in motel units. Statements provided by parents in 1974-75 indicated that 65% of the pupils live below the poverty level, as identified by the Orshansky Scale. Title I funds help provide staff for extra learning opportunities for the neighborhood pupils with learning difficulties. Test data indicate that any pupil who has been at Patterson for three or more years and has normal learning ability performs at or considerably above grade level.

Principal's Statement

Westmoreland School offers the advantages of a large school. Along with the regular classroom teaching staff, we have full-time:

1. Reading Specialist
2. Physical Education Specialist
3. Arts Specialist
4. Librarian
5. Counselor
6. Resource Teacher

We have a "regular" school program which meets the curriculum Goals and Ojbectives established by the School District.

Principal's Statement

Silver Lea School has both contained classrooms and non-graded classes. About one-third of our students are in an alternative school-within-a-school which is taught by a team of six teachers. We believe that parents should have a choice of some alternative types of organization for their children. The main difference between the schools is that the alternative school is non-graded, and students are given the responsibility of making their class schedules each week. There is a close working relationship between the Corridor School Team and the rest of the staff.

Principal's Statement

Spring Creek has a special organizational structure which encourages maximum participation of staff members in communicating, planning, and decision-making. There are three instructional units -- Primary, 3-4, and 5-6 -- each of which is coordinated by a curriculum associate. The C.A.'s participate with the principal in a leadership team.

Specialists in music, P.E., reading, speech, media, and counseling are staff members. Teachers are trained in implementing the guidance components of Career Awareness and are receiving training in the use of S.A.P.A. II Science materials. Laboratory approaches in math and social studies supplement regular instruction. Trained parent volunteers assist in our remedial reading program.

25. Math Total (grade 11)	School average	53 percentile.
	District average	59.59 percentile.
	Publisher's average	50 percentile.

Principal's Statement

Among the outstanding features of Sheldon High School are:

A newly initiated sequential program in English concentrating on grammar and usage, reading comprehension, and four semesters of vocabulary development.

A newly initiated mass-media center which offers a comprehensive career education in all aspects of media.

A newly initiated repertory theater featuring classical and modern drama.

A team-taught interdisciplinary program in humanities incorporating art, music, history, and literature.

Strengthened vocational programs.

Perhaps the most important dimension of the Sheldon learning environment is the close relationship that exists between students and staff. The 8 period day, open labs, and resource centers provide the time and places for individualized instruction by a staff responsive to the needs and feelings of the students.

Principal's Statement

Instruction in the basic skills is the core of the curricular program at James Monroe Junior High School.

Basic skills are emphasized in Reading, Math, Language Arts, Science, Social Studies, Physical Education and Health. All classes at Monroe are on a semester basis (18 weeks).

Reading is required for every seventh and eighth grade student for a full year in addition to Language Arts (rhetoric, composition, and literature). The reading program includes testing to determine a student's reading level with the goal to advance skills in reading vocabulary and comprehension to the approximate level of the student's ability. Reading includes work study, decoding exercises, spelling, and developmental reading.

Enrichment is offered via a well-developed elective program which emphasizes a multi-media approach.

Principal's Statement

Willakenzie is a child-centered school, interested in helping boys and girls in developing to their full potential. Special programs are available for students who have unusual academic or social needs. A Learning Resource Center has been established at Willakenzie. The center includes a class of the emotionally handicapped, a class for the educable mentally retarded, a class for learning disabled students, with special help being given from the school psychologist, the social worker, the school nurse, and classroom teachers. Other specialists at Willakenzie include a physical education teacher, a music teacher, and a hearing speech teacher.

Volunteers are used extensively at Willakenzie in a variety of ways: to assist classroom teachers, to tutor individual students with reading and math skills, to direct a fifth-sixth grade choir, to work as camp counselors for the upper grades Resident Outdoor Camp, and to assist with health screening needs.

	Publisher's average	50 percentile.

Principal's Statement

South Eugene High School is the original Eugene High School, becoming South when North Eugene High School was opened in 1957. The attendance area includes downtown Eugene as well as much of the south hills.

A comprehensive high school with a full range of subject disciplines, South has some reputation in Advanced Placement, a system whereby a student may take courses in high school which, when a final exam produces a high enough score, can bring college placement and credit.

New facilities in industrial arts and in arts and crafts have increased the potential of offerings in these areas. In addition, by 1976-77 we hope to offer career studies in social science.

		Publisher's average	50 percentile.

Principal's Statement

Roosevelt expects each student to build a selective and individualized educational plan. Most classes are open to any student. Each student may learn how to be responsible by having the opportunity to be responsible. A strong guidance system is the keystone: each staff member provides an adult guidance for 20 students meeting daily.

The program provides the strong basic skills courses common to all 4J junior high schools. It differs because all courses are elective, and must be high interest offerings to attract student enrollment.

The flexibility built into this program, to more closely meet the needs of each individual, makes unusual demands upon students, parents, and staff. The program has flourished for seven years primarily because of the personal commitment and effort of Roosevelt teachers.

Principal's Statement

The Edison Building houses two programs. One is the Edison Program with kindergarten through grade 6, with a more conventional pattern. Children are assigned to self-contained classrooms. Some classrooms have combined grades, others have one grade. Teaching styles vary from informal and open to structured programs.

The Eastside Program is ungraded with children from one through six grade working together. The staff works very closely together in planning the instructional activities and changing schedules. Children and parents are expected to have a voice in many of the learning experiences. The organizational pattern includes both family rooms and children assigned to adult advisors.

Principal's Statement

Lincoln Elementary is located near downtown in one of the oldest neighborhoods in the city. The attendance area is involved in a transition; where once it was quiet and prosperous, it is threatened with commercial encroachment, traffic and noise. The school population mirrors these changes and the staff at Lincoln, in turn, reflects the varied needs of the students. Teaching philosophies and styles range across a broad spectrum; a vigorous attempt is made to fit the education to the needs of the student here. Lincoln also maintains a highly successful community school program which involves large number of students ranging in age and interest from senior citizens to teenagers and small children.

		Publisher's average	50 percentile.

(Metropolitan Math Test for 1974-75)

26.	Math Total (grade 6)	School average	50 percentile.
		District average	48.12 percentile.
		Publisher's average	50 percentile.

Principal's Statement

The Frances Willard School program has a strong thrust in terms of informality and personal involvement and commitment. This program has continued an emphasis on a positive, responsive and imaginative approach in creating a learning environment for students. Meaningful student, parent, and general community involvement in planning and program implementation.

An ungraded emphasis along with an individualized instructional approach will continue to be stressed. Reading, Language Arts, and Math have been designated as being top priority subjects. Successes and failures of programs will be determined both by formal testing program and through students, parents, and staff members.
